The "spirit" of a Sentient being is constantly alive, awake, functioning and susceptible : the Physiological functions of breathing, pulse , pressure, blood Flow, electromagnetic Effects and Temperature continue Functioning even when Asleep - these continued Functions are propelled by the Spirit within the being; thus the Health of "spirit" is Vital and is Nurtured by Truth .

---

When a being Departs, the Physiology physicality ceases, and the Spirit yet remains Alive ( Spirit is Energy and by Intrinsic pre-determined Nature , is Imperishable) with all it's Inputs, Decisions and Experiential memories.

IMAGERY is the method that Communicates to Spirit, various possibilities, dimensions and parameters.

A hand is shown writing on a glowing, golden scroll that appears to be made of light or sand. The scroll is held in the lower-left corner. In the background, there is a night sky with a starry galaxy, a butterfly with glowing wings, and a range of mountains illuminated by a soft light. The overall scene is ethereal and inspirational.
